assured smile with homeopathy

Dr. Samuel Hahnemann
(Founder of Homeopathy)

Dr. Samuel Hahnemann discovered homeopathy and established its principles with balanced application of science and art. The fundamentals of homeopathy are based on principle of 'similar cures similar'.

Homeopathy is Nano-medicine because it works at the fundamental level subtler than gross cells. The world knows Mr. Michael Faraday as the father of Nano-science, who was born in 1791 whereas Homeopathy, the science with Nano-medicine, was discovered in 1796 by Dr Samuel Hahnemann. Today, homeopathy is recognized by the World Health Organization as the 2nd largest therapeutic system in the world which is practiced in more than 100 countries and there are more than 10 to 15 million users of homeopathy in India.

Over the centuries, homeopathy has delivered its promise and blessed billions with holistic health by rousing body's self-healing mechanism and strengthening it with individualized treatment.
